VoiceMail service by
Goldfield Access Network

SIMPLE - CONVENIENT -
RELIABLE - AFFORDABLE

ONLY \$3.95
PER MONTH

USE WITH INTERNET
ACCESS - RECEIVE YOUR
MESSAGES VIA E-MAIL

Auto-Login: This feature will allow you easy access to your mailbox when you are calling from the voice mail phone. Ideal for those not concerned with security features and want quicker access to their voice mailbox. Can be turned on/off as desired.

Message Waiting Indication: This feature activates the stutter dial tone or the message light on the phone when there are new messages in the mailbox.

Daily Notification: This feature allows you to set up a time of the day to notify you that you have a new voice message. On the days that you do not have any new messages, the service will not give you a notification call.

Announcement Only: This feature is for those that want to use the service to deliver an announcement only without giving the caller the option to leave a message. This is useful for schools that want to announce school closings or businesses that want to give their business hours.

e-forward Option: This feature allows you not only to store your messages in your voice mailbox, but it also converts it into an E-mail. You can listen to or forward your messages, save or delete them from your voice mailbox. This is very useful for those that have dial-up Internet. You will never miss a message that is urgent because you are on-line.

Message Reply: If the caller presses the 5 key while the message is playing, the service will attempt to place a call to the person (the number they dialed from) that left the message.

Message Forwarding: This feature allows you to forward a message to another mailbox or distribution list. You can also record an intro message to tag to the front of the message you are forwarding.

Website Access Authorization: This service allows you to access your voice mail service to retrieve your messages, save or delete them, and make changes to your service from a web site. You will receive a User ID and Password to ensure complete privacy.
